Declines Run as High as Four Points in Some Stocks.

Mr. Hill spoke with indisputable authority, at least, as regards the large realway interests with which he is personally connected.

This is an issue that has been sharply debated in recent weeks, one party in Wall street asserting that the railroads were to "come in" to the iron and steel market in a vigorous way at a time not remote; others maintaining that the physical condition of the railroads is now so good that there is no need of large immediate expenditures for further introduced in the money market imposes different forms. First deed of Irust notes (first mortgages), well secured on real estate in the District of Columbia, constitute "gilt-edge" investments. They do not depend upon the financial responsibility of individuals or corporations for their stability, and are exempt from taxation as personal property.
